DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Duquette (6,667,877).
3. Duquette teaches dual-screen notebook computer (figures 1 & 3-4) comprising: a notebook computer (laptop computer, (figures 1-4, (10)) and column 5, lines 10-15), the notebook computer having an LCD display module (laptop computer, (figures 1-4)); a pivot structure (figures 1 & 4, (50 & 80)) provided at one side of said notebook computer (column 5, lines 15-25, and column 5, lines 39-45); and a supplementary display module (second monitor screen, (figures 1 & 4, (70)) fastened pivotally with the pivot structure and electrically connected to an internal control circuit of said notebook computer for output of current status information of said notebook computer (figures 1-4, column 15-67 and column 6, lines 23-51).

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Duquette in view of Batio (5,949,643).

Duquette teaches all claimed limitations in claim 2 except that a game boy control button module.

However, Batio teaches a game boy control button module (game pad, (figures 1 & 12, (11)) installed in the notebook computer (column 2, lines column 3, line 60 through column 4, line 5, column 5, lines 42-55, column 7, lines 24-37, column 8, lines 45-56 and column 9, lines 24-45).

Therefore, it would have been obvious to one ordinary skill in the art at the time the invention was made to incorporate Batio's laptop computer having a game control into Duquette's display device so as to use for playing a video games (column 2, lines 30-34).

3. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Duquette in view of Khan et al. (2003/0115474 A1; hereinafter referred to as Khan).

Duquette teaches all claimed limitations in claim 3 except that a digital video camera installed in said notebook computer.

However, Khan teaches a digital video camera (figure 1, (10)) installed in said notebook computer (figure 1, (12)) (figures 1-2, column 3, paragraphs 0024-0028).

Therefore, it would have been obvious to one ordinary skill in the art at the time the invention was made to incorporate Khan's camera installed into a computer into Duquette's display device so as to use for secure access system relies upon the capture of an accurate facial image (column 3, paragraph 0025).

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ponx (2003/0142469 A1) teaches double screen laptop.

Ho (2004/0136150 A) teaches an add-on display module for portable computer.

Hussaini et al. (2004/0229695 A1) teaches a video game controller with integrated video display.
